Office Action Summary

Art Unit: 2856

1. The corrected or substitute drawings were received on July 25, 2002. These drawings are acceptable.

2. The indicated allowability of claims 20-28 is withdrawn in view of the newly discovered reference(s) to Ishihara et al, U.S. 5,809,642 cited in the IDS. The delay in its application is regretted. Rejections based on the newly cited reference(s) follow.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 20-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishihara.

Note abstract, Fig. 4 and col. 4 lines 49-55.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 28 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ishihara.

Art Unit: 2856

Ishihara discloses mounting to help better control production but does not specifically state doing a parameter adjustment. However, such would have been obvious to help avoid the continued production of known defects.
